

Investor Portal Solution

What is **Investor Portal**

The Investor Portal is a solution for Investors of our Clients who operate Central Security Depositories (CSD), which allows to perform a rich variety of Investor Management services.

The application is publicly accessible via a web-browser and **offers end-user Investors** (beneficial owners) a convenient and user-friendly interface **to access** their CSD balances, CSD accounts and financial instruments without requiring direct interaction with their Broker or Custodian.

Product Overview

Our cutting-edge technology empowers Central Depository Clients with the ability to effortlessly view their account balances and execute various types of depository operations, all while experiencing exceptional performance (millions investors and transactions).

Located in the secured internet zone, Investor Portal provides investors with secure online access via an internet connection.

RIM consists of a front-end application and a backend application located in a secure VPN zone with direct, closely-coupled connectivity to the core CSD System.
